

Amendments to the Claims

What is claimed is:

1. (Currently Amended) A single sheet of foldable material cut and scored to define a container blank, comprising:
 - a bottom panel;
 - a side panel connected with the bottom panel;
 - an end panel connected with the bottom panel;
 - a top panel connected with said side panel opposite said bottom panel;
 - a top panel flap connected with said top panel;
 - a corner first panel connected with said end panel;
 - a corner second panel connected with said corner first panel opposite said end panel;
 - a corner third panel connected with said corner second panel opposite said corner first panel, said corner third panel defining a corner third panel cutout,
wherein said corner third panel cut-out extends to a free end of the corner third panel
such that said corner third panel cut-out is cut from an edge of the corner third panel that lies substantially parallel to a line formed by the connection of the corner third panel to the corner second panel, said corner third panel cut-out also being cut from an edge of the corner third panel that lies substantially perpendicular to a line formed by the connection of the corner third panel to the corner second panel.
2. (Original) The blank of claim 1, wherein the sheet of foldable material is at least one of a containerboard, paperboard or corrugated material.
3. (Previously Canceled).
4. (Previously Canceled)
5. (Original) The blank of claim 1, further comprising a handhold cutout in said end panel.
6. (Currently Amended) A single sheet of foldable material cut and scored to define a container, comprising:
 - a bottom panel;
 - an end panel connected with the bottom panel;
 - a side panel connected with the bottom panel;
 - a top panel connected with said side panel opposite said bottom panel;

a top panel flap connected with said top panel

a corner first panel connected with said end panel, said corner first panel being adjacent said side panel;

a corner second panel connected with said corner first panel, said corner second panel being adjacent said corner first panel, opposite said side panel; and,

a corner third panel connected with said corner second panel, said corner third panel defining a corner third panel cutout,

wherein said corner third panel cut-out forms a top edge that is below a top edge of the end panel in the region of the corner third panel cut-out such that said corner third panel cut-out is cut from an edge of the corner third panel that lies substantially parallel to a line formed by the connection of the corner third panel to the corner second panel, said corner third panel cut-out also being cut from an edge of the corner third panel that lies substantially perpendicular to a line formed by the connection of the corner third panel to the corner second panel.

7. (Original) The container of claim 6, wherein the sheet of foldable material is at least one of a containerboard, paperboard or corrugated material.

8. (Previously Canceled)

9. (Original) The container of claim 6, further comprising a handhold cutout in said end panel.

10. (Original) The container of claim 6, wherein the length of said corner third panel is less than one half of the width of the end panel.
